TI-1C/19

Latihan 1 :

```java
import java.util.Scanner;
public class Latihan1_19 {
    public static void main (String[] args) {
        Scanner sc = new Scanner (System.in);

        int bil1, bil2, bil3, terbesar;

        System.out.println(x: "Bilangan 1");
        bil1 = sc.nextInt();

        System.out.println(x: "Bilangan 2");
        bil2 = sc.nextInt();

        System.out.println(x: "Bilangan 3");
        bil3 = sc.nextInt();

        if (bil1 > bil2) {

        } if (bil1 > bil3) {
            terbesar = bil1;
        } else {
            terbesar = bil3;

        } if (bil2 > bil3) {
            terbesar = bil2;
        } else {
            terbesar = bil3;
        }

        System.out.println("Bilangan Terbesar Adalah" + terbesar);
        sc.close();
    }
}
```

Latihan 2 :

```java
import java.util.Scanner;

public class Latihan2_19 {
    Run | Debug
    public static void main (String[] args) {
        Scanner sc = new Scanner (System.in);

        System.out.println(x: "Masukkan Hari");
        String hari = sc.nextLine();

        System.out.println(x: "Masukkan Jenis Buku");
        String buku = sc.nextLine();

        System.out.println(x: "Masukkan Jumlah Buku");
        int jumlah = sc.nextInt();

        System.out.println(x: "Harga Buku");
        double harga = sc.nextDouble();

        double diskon;

        if (hari.equals(anObject: "Rabu")) {
         if (buku.equals(anObject: "Kamus")) {
            diskon = 10;
            if (jumlah > 2) {
                diskon = diskon + 2;
            }
         } else {
            if (buku.equals(anObject: "Novel")) {
                diskon = 7;
                if (jumlah > 3) {
                    diskon = diskon + 2;
                } else {
                    diskon = diskon + 1;
                }
            } else {
                if (jumlah > 3) {
                    diskon = 5;
                } else {
                    diskon = 0;
                }
            }
         }

    } else {
        // Selain hari rabu
        diskon = 0;
        }

        double subTotal = harga * jumlah;
        double totalDiskon = subTotal * diskon / 100;
        double totalBayar = subTotal - totalDiskon;

        System.out.println("Jenis Buku      :" + buku);
        System.out.println("Jumlah Buku     :" + jumlah);
        System.out.println("Subtotal        :Rp" + subTotal);
        System.out.println("Total Diskon    :" + diskon + "% (Rp" + totalDiskon + ")");
        System.out.println("Total Bayar     :Rp"+ totalBayar);

        sc.close();
    }
}
```

Latihan 3 :

```java
import java.util.Scanner;
